Sadly this game has become worthless to me. I only ever played as a split screen multiplayer game and recent updates have removed that mode. Please bring back the split screen mode.. I love beat'em ups and Bud Spencer movies, but this is not fun. I also love the art style, but...

Fights to easy and repetitive, no challenge there. But the real problem are the mini games. I stopped when I got to hot dog eating contest. 3 minutes !!!! of some sort of rock-band game play.

Too bad.. It's very early Alpha but I like the concept. The voice acting isn't half bad the levels and enemies need work but again it's super early on for this title and I'm glad to see true independant devs at work. I've spent more on worse that's for damn sure. So I'm going to keep the game and watch how it goes. The gaming world could use a good "Leap of Faith" project and no better place than VR to do it. Good luck devs I'm pulling for you!. As of May 7th 2015 it's still very-much in beta mode, issues with Wacom tablet sensitivity, setting canvas size and the documentation is far from complete (a lot of missing and wip pages). No practical brushes are included, I guess it's up to the user to make them. Brush generation is less extensive than it was made out to be. Interesting but I can't recommend it in it's current state. Download Krita instead.. If you like tsunako's drawings even a bit, this is absolutely worth it. I feel like this was the best dlc i purchased in the entire IF\/Compa games(I own all of the neptunia and fff games).

BUY IT FOR THE ARTBOOK.. Nice song Love 8 bit ver. XD #TeamLinhu. english:

This game is worth !! download !!! You fight in all sorts of maps you can select the type of weapon you want, choose a character and choose clothes

Neat little game. There isn't a lot of gameplay here, it is more a case of wandering about in a group and talking, sometimes tuning a radio, and sometimes making some decisions. They handle the conversations really well though, and it feels a bit like you are playing through an adventure akin to the old classics like the Goonies, or something more recent like Stranger Things.

Gameplay wise it really isn't my usual cup of tea, but I gave it a shot because I'd heard the story was good. Story is something sorely lacking in a lot of otherwise great games, so I like to give things like this a chance. I'm glad I did. I wish there was more actual gameplay in here, but I am really glad I played through it anyway. I might play through it a second time at some point.

If that sounds like it might be up your street, I don't think you will be disappointed.. Good stuff, got immersed in the story and anime tiddies are pretty good. I do kinda wish it had more content though (coughcough more pictures in the extras menu). The price is fukn amazing tho.
10/10 would ♥♥♥♥ an xbox again

P.S. episode 2 release date?. I don't like the story: the parts about the everyday life are ok, but when the "serious" stuff comes it looks unlogical and unrealistic for me. Also I don't like that I need to complete all other endings to open the true one.
P.S. Some music tracks are really good.. I have played at least one great verticle shooter (Aero Fighters), but IMO this game is just frustrating in a gimmicky way. Crashing against the first boss worked for me 1\/10 times, and I am not a fan whatsoever of the countdown to Game Over mechanic. Having the character slow down when moving is interesting, but again, it just seems like another gimmick to make the game stand out rather than be enjoyable. I'm not adept at bullet hell games, so take this opinion as you will.. Fun runner game with easy achievements! Recommended. :D. Would be worth the money if it worked. It doesn't though, I've tried it on three computers now and on each one there was some bug that made it worthless.. Good for the money, it is well worth a go. Its your typical platform game, it can be challenging and it gets you thinking.. Many characters. Such combos. Very epileptic. 8\/10.. Waste of money.
